

# Egg carton unplugged coding activity!

View the above link for an unplugged activity.

You can do this with egg cartons or simply use the board from a game like chess or checkers. Anything with a grid will work, even if you draw it out yourself on paper.

***Coding Capers: Luci and the Missing Robot* is available for purchase on [Amazon](#).**

This STEM-friendly tale takes children on a fun game of hide and seek that teaches coding terminology and how technology and computer science work together to create and manage so many of the things we use in our daily lives. With a little ingenuity and a lot of perseverance, Luci and her friends follow the clues and end up with a surprise that will allow each of them to help others and **inspire the next generation of leaders.**
